SUMMARY

Software Engineer with an excellent work ethic, a passion for teamwork, and a quick learner. Experienced in programming languages like C# and JavaScript through non-academic projects and hackathons. Adept at identifying innovative solutions and collaborating with diverse teams to drive project success. Seeking to leverage my technical expertise and skills to contribute to innovative solutions in a collaborative and challenging environment.

EDUCATION

General Sir John Kotelawala Defence University

2018 - 2022

- BSc (Hons) Software Engineering

Kegalu Vidyalaya - Kegalle

2017

- G.C.E. Advanced Level
 - Combined Maths - C
 - Physics - C
 - Chemistry - S
 - General English - B

2013

- G.C.E. Ordinary Level
 - A - 8
 - C - 1

WORK EXPERIENCE

Software Engineer | Spil Labs (Pvt) Ltd

Feb 2025 - Present

- Developed a C# library to send emails using OAuth2 authentication, replacing the legacy SMTP basic authentication. Successfully integrated this into an existing VB.NET ERP application, modernizing the email-sending process.
- Currently leading code restructuring efforts to modernize the ERP system by converting the legacy VB.NET Windows Forms application into a .NET Core Web API backend with a ReactJS frontend.

Associate Software Engineer | Vallibel Finance (Pvt) Ltd

Jan 2024 - Feb 2025

- Developed a web application using .NET Core and React to streamline direct deposit management and enhance the receipting process, improving operational efficiency.
- Enhanced and expanded the functionality of an existing web portal by developing new features and creating a backend using PHP, JavaScript, and MySQL, improving user experience and system performance.
- Contributed to the development of a new barcode system to improve file tracking management and streamline the handling of rejection processes, improving operational accuracy and efficiency.

Software Engineer Intern | QualitApps Asia (Pvt) Ltd

July 2021 - Jan 2022

- Collaborated with the .NET development team to build and enhance a Medical Center Management System using .NET, contributed to developing an Angular front end, and implemented a comprehensive reporting module to generate detailed operational insights.

TECHNICAL SKILLS

Programming Languages

- C#, Java, JavaScript, PHP, VB.NET, C++

Frameworks

- Angular, ASP.NET, ASP .NET Core

Libraries

- React, JQuery

Databases

- SQL Server, MySQL, Firebase

Version Control Systems

- GitHub, GitLab, Azure DevOps

Platforms Familiar With

- Windows, Ubuntu, Android

NON-TECHNICAL SKILLS

- Multitasking
- Creative
- Good communication skills
- Fast Learner
- Adaptable
- Service-focused

ACHIEVEMENTS & HACKATHONS

Imaginelf | Entrepreneurship Boot Camp

2018

- Achieved Second Runner-Up by developing and pitching an event management web platform, showcasing skills in web development, business strategy, and presentation.

HAXMAS

2019

- Developed a web application to manage charity operations as part of the HASXMAS event, pitched the project, and secured 4th place.

Let Me HACK eco | Inter University Hackathon

2020

- Developed a backend system for the given project using Node.js within a limited timeframe. Achieved 7th place out of the top 20 participants.

Aithon v1.0

2021

- Successfully created a solution during the hackathon to categorize countries for COVID-19 vaccine distribution using K-means clustering, demonstrating skills in data analysis and machine learning.

PERSONAL PROJECTS

Android App for Real-Time Parking Availability

2019

- Developed a Parking Location Finder Android application using Firebase for real-time database management, enabling users to easily locate available parking spaces and view relevant details.

Prediction of Electricity Consumption Using Machine Learning Approaches

Jan 2021- 2022

- Developed an application to predict electricity consumption using LSTM, a type of recurrent neural network, to model time-series data. This project was selected for KDU Student Symposium 2020, showcasing its innovative approach to energy forecasting.
